LABELING LINE

STROZA

create to innovate

60500

The labeling line is used for transporting and labeling paper boxes. The line has a modular design and allows for various configurations depending on the modules used. The line can be easily adjusted and set up for a wide range of box sizes. In the selected configuration, the line includes 2 labeling modules, 2 rotary conveyors, and an alignment module. The line has a separate control panel and is controlled by an industrial PLC with a touch screen.

HIGHLIGHTS

- Sealing with a transparent label secures the box in a closed state.
- The label can be applied on all 4 sides and also over the edge of the box.
- Wide variability of settings for the dimensions of sealed boxes.
- Easy adjustment of the line to different product dimensions.
